

ANTI-TERRORIST PROJECT WITHIN PUBLIC HEALTH INFORMATICS

Author: Nigora M. Asimova

Published in: “Problems of Theory and Practice of the Modern Medicine”, Materials of 64th Scientific – Practical Conference of the Tajik State Medical University named after Abu Ali ibn Sina (Avicenna) with International Participation, dedicated to the 25th Independence of Republic of Tajikistan, November 18, 2016, pp 641-643.

Problem background. Terrorists – who are they? According to Convention definition – terrorists can be anybody, they are hidden society, that is classification under categories of agents, aimers, spies and performers. [3]. **Bio-terrorism** is to be the cheapest way to use and the most problematic for the peaceful citizens in general. It is intentional release of pathological dangerous germs, food poisoning or poison gas spray (for example arsenic inhalation or powder in food) that kills people slowly by damaging liver, brain, kidneys and/or skin because the infection or poison takes hours or days to become apparent and clinically symptomized. It's hidden unlawful dangerous terrorist act, therefore it is important for general public to understand the risk of this type of terrorism that they might be faced to and suffer few days to death. Nowadays, **social networks** are very developed and spreading rapidly all around the world and computer/Internet communication is available everywhere. Social networks such as Facebook (American social network), Odnoklassniki.ru (Russian social network), photo-network (ex: Facebook, Instagram, Dropbox) or even dating websites are the convenient way for communication and planning of terroristic acts. Mobile apps are another way of communication between terrorists [2] and they use them as tips to perform one or another terroristic act. Terrorism is a broad subject of study therefore I will touch only Internet based social network communication language and “electronic coding system”. **How terrorists communicate? What coding language they use?** Mainly by photo and texting, also using video or fragment of films which gives a direct or indirect knowledge of associated information they want to deliver to their agents, the concept of body-sign-motion language, the background noise and environment is also may give an additional information, sometimes even words are not important rather than the sign language, the photos reflect colors, shapes, image of subject associated with another. Symbols of logos can be depicted in different field of science or religion, tradition and history of that nation relatively. It is very important to have a little bit imagination and knowledge of that concept in heart. Numbers – can reflect anything (pointing to any verses of Holy books, address, quantity, meaning according to biblical science, i.e. numerology; mathematics, historical reflection as significant dates of events, etc.) The posts they use in Facebook, is from news or advert/information pages by searching correlated information they want to deliver to their agents and performers. Terrorists and their agents (IT and non-IT personas) are everywhere, they could be your close friend but betray you behind your back, therefore peace-makers **MUST** be very careful and alert **OBSERVER** in every steps as a **SILENT WARRIOR**. **Computer application:** Decision Support System such as Machine learning is a tool to analyze the data and text, time series to prevent and predict the possible incoming tragic events planned by terrorists. According to machine learning result, this website as a terrorist activity platform and communication worldwide between themselves based on Information Technology <http://ubs-hainer.com/solutions/p-tracker>. It seems very well organized and planned, so it can be used as a contra tool as a mirror reflection and/or track their activity.

Schema 1. The activity flow of the project is shown below:

Solution. The interaction of IT management with other sub management systems is crucial. Digital business strategy is the future. Multidisciplinary approach required to solve problems of terrorism that touches Religion based Law, parapsychological, psychological, philosophical, humanitarian, technical and medical sciences, Information Technology (IT), scientology, logic, mathematics, numerology, astrology and astronomy, occupational and medical based therapy, Police, Military and Secret Intelligence services. To understand the concept of the strategy against terrorists, let me explain briefly the basics of the project initiation. Under Religion based Law I mean Holy Books such as Torah, Bible, Quran, Avesta[4] and its quotes and verses which has powerful psychological influence to religious people and Islamic States (ISIS or Talibans which destroying historical heritage and murdering people). For example, radical Muslims conflicting with Christians regarding Resurrection and Jesus's nature, for them Quran verses that clearly describes Resurrection (Surah 75. The Resurrection and Surah 19. Maryam) and Islamic version that describes in Quran that another man was crucified instead of Jesus and Jesus was saved from murder. Bible describes about Second Coming of Jesus as "Son of Man" and importance of this phenomenon to the World as a solution of the conflict and disputes of Jesus nature. Therefore, religious radicals don't understand the meaning of Quran and Bible and misinterpret it, unfortunately, and use it for their profit unlawfully and disgrace the name of Prophets of Islam and develop wrong stereotypes of Muslims and philosophy of Islam causing Islamophobia to others. **It is Holy War under Last Messiah's ruling** (Princess of Peace, she has a mark (birthmark) on her thigh inscribed name/seal of the last Prophet - Muhammad (SAW) in Persian/Arabic that his name is pointed in one verse of Holy Quran, Al-Ahzaab 33:40 and Bible verse pointing hint to recognize the Second Coming of Jesus in Revelation 19:16 (it describes as he has the name inscribed on his thigh 'King of kings or Lord of lords'). The Last Messiah is a mortal human as any other individual, she is just a Clear Warner and Premonitory Messenger of God to all mankind because she is the Sign of the Hour/Judgment Day that clearly said in Holy Quran chapter Az-Zukhruf 43:61 and 43:63. She lives as an ordinary person among us (not famous, not rich nor poor but came from nobility). Last Messiah is the Resurrected **Muslim female** by Allah's Light (an-Noor) after she has been hanged on neck that happened **on January 17 to 18, 2010 in ICU Clinic B of Gransha hospital, Londonderry, United Kingdom [1]** that this event is prophesied in Holy Quran, **Surah Al-Hajj 22:15, 22:16**. She is Light Bearer (Lucifer derived from Latin "Lucem Ferre") of Three Holy Sprits/Prophets of Zarathustra – Jesus – Muhammad, she has her own coding language - Five Languages-in-one:

Tajik, Arabic, English, Russian and Swedish and its combination, mix&match in writing, pronouncing, reading and meaning including different Tajik dialects and Russian slangs - Swinglish, Tajrus, Swetaj, Tajeng, Swerus, Tajarab, Rusarab, Arabeng, Swearab, Ruseng; that slightly differs from other coding languages but it is known only for those who knows her very well. She uses "Fox" method to detect terrorists according to Krylov tale "Fox and crow"/"Lisa i vorona"[5]. Her coding language based on Signs of God that she receives in daily bases from nature, natural events like volcanoes and earthquakes, weather, streets, buildings, flowers, birds, insects, animals, children, people around. She recognizes terroristic P-trackers upon her neck buzz and other body symptoms. Therefore, it is vital that she is able to act **freely in liberty**. Upon the Signs she has given, she transforms it into digital world through social network Facebook as giving predicate warning and tips/hints to the righteous people in order to prevent terroristic event as she is the Savior of the World, the Bearer of Life of the Planet, "Princess of Peace". She is doing the research regarding what asteroids might hit the Earth and it took her 13 years of her life time to determine it - Violetta 557, Eros 433, TK2010, Venus and Mars. Three more asteroids that has to be defined is yet to come.

Risk management and coordination: Holy War, i.e. **World Wide War** based on **Wise Way Wisely** using **World Wide Web**. Public communities, non-terrorist individuals (victims of sexual slavery and drug abuse) and Peace-seeking citizens can be involved into the process with the strategy concept of "All in the same boat". The category of anti-terroristic agents has to be categorized as tracker-informers (secret spy among terrorists and non-terrorist personas), and performers (terrorists themselves). **It is benefit for all to live in peace and safety without being under danger of terror all the time. We fight for life to change the World for the better.** Terrorists are humans as well, they eat, they have intimate life, they hire prostitutes or rape their victims/slaves. Those prostitutes and slaves can be turned to fighters as they are already victims and under their slavery on daily basis and are under danger/life threat; **they must fight as a "silent warrior" on the basis of these verses of Nobel Quran: The Romans 30:28; Ash-Shura (The Counsel) 42:40; Az-Zukhruf (the Embellishment) 43:61**"Verily, The Sign of the Hour is he (Muhammad, Isa or Quran) Do not hesitate about him and follow Me! This is the straight path". This verse/ayat is verily meant about Second Coming, the Last Messiah. (This verse/ayat is verily meant about Second Coming, the Last Messiah); **Al-Kahf (the Cave) 18:07**. "Verily, everything on Earth We made as embellishments for her to test people whose deeds will be the best".
