Call for Papers

Dear Colleagues and Researchers:

You are invited to submit a paper for possible inclusion in **Stochastic Models in Probability and Statistics** (**SMPS**), housed in the Department of Statistics at the Ferdowsi University of Mashhad. **SMPS** is an international and peer-reviewed electronic journal in the field of theoretical and applied statistics and probability with an emphasis on reliability.

The journal publishes original research articles in the areas of stochastic models in probability and statistics emphasizing their applications in reliability, including but not limited to reliability theory, mathematical methods in reliability, lifetime data analysis, models for ageing and life extension, statistical modeling in reliability, statistical methods in operational research, stochastic models in industrial and systems engineering, optimal modeling in maintenance, quality control and monitoring process, stochastic control, nonparametric methods in lifetime analysis, statistical methods in information theory, ordered data models and their applications, stochastic orders, survival data analysis, software reliability, data analysis in reliability, copula methods and dependence modelling, big data, and reliability applications. The language of the Journal is English and it published two issues per year. The journal welcomes articles, dialogues, notes, book reviews and further comments thereon, in keeping with editorial policy; see

https://smps.um.ac.ir

For first (initial) submissions, we require a single pdf file, but for revised submissions, the editable source files (Word or LaTeX) should be provided. Our online submission system guides you stepwise through the process of entering your article details and uploading your files. All peer review is single blind and submission is online via https://smps.um.ac.ir/contacts?action=loginForm.

Regards,

Editor-in-Chief
Stochastic Models in Probability and Statistics (SMPS)
